INDEX TO VOLUME VII.

JULY TO DECEMBER,

1902.

ABERDEEN Cable Subway and Outfall Sewer, G. R. G. Conway, 492
Action on Boilers of Feed-Waters, (Bowen on), 559
Advantages of Electrically-driven Machinery, Economy and, (Broadbent on), 555
Africa, *see* British Central Africa, Egypt, *and* South Africa
Alcohol as a Motive Power, French trials of, 85
  possible source of for, and for Lighting and Heating in Ireland, 86
Alternating Current Electrolysis, Experiments on, (Trotter's), 181
Alternators, Single-Phase, on Polyphase Circuits, American Experiments with, 556
America, Central, *see* British Guiana and British Honduras
——(n) U.S., (*see* Cullen Ball-bearing Rifle Gun, Detroit, Franklin Institute, New York, Niagara), Coal Strike in, (L.), 381
  Electricity Direct from Coal in, (Johe's patent), 347
  Engineer in England, The, (Sloan on), 461
  Experiments with Single-Phase Alternators on Polyphase Circuits, 556
  Institute of Electrical Engineers, Report of Committee on Standardisation, 489
  Locomotives in Egypt, 6
—— Modern Compound, (Lake on), 518
  Mining Machinery, British and, on the Transvaal Gold-fields, P. J. N. Fowler, 117
  New Method of making Armour Plate in, Invented by Lt. Davis, U.S. N., 352
  Novel Suspension Bridge in, Easton, Pa., 438
  Proposed adoption of the Metric System in, 3, 4
  Steel Car Foundry Co., St. Louis, 30-ton Steel Bogie Wagons built by, for the Caledonian Railway, 532
  Submerged Water-pipes in, (Holmes on), 553
Amos, E. C., A Record of British Enterprise on the Continent, (Middleton's work at the Entrepôt Docks, Amsterdam), 320
Amsterdam, Entrepôt Docks at, Middleton's work on, 320
Analysis, The, of Trial Trip Data, of Steamships, H. B. Donaldson, 388
Apprentices, Encouraging, Handyside's and Palmer's method of, 564
Arc Lamp, The Bremer, Tests of, 564
Architects and Engineering, (L.), 284
Armatures, Toothed-Core, The Heating of, (Davies on), 467
Armour Plate, New Method of making, (Davis' invention), 352
Armoured Cruiser, New First-Class Twin-Screw, *Good Hope*, 530
Aspect, *see* Commercial Aspect
Association of Municipal Tramway Managers and its deputation to the Board of Trade, 93
Australia, *see* Sydney, N.S.W.
Austria, Modern Compound Locomotives, (Lake on), 518
Auxiliary Valve, An, J. M. Wright, 174
Axle-boxes, "Cortazzi," 535, 536.

BAKER Street and Waterloo Electric Railway, tunnel of, under the Thames, 551
Ball-bearing Ordnance, The Cullen Ball-bearing Rifle Gun, 347
Bath and its Municipal Electric Lighting losses, 527
Batteries, *see* Storage Batteries
Beams. Bending Moments and Moments of Resistance, Notes on, H. G. Ticehurst, 135
Bearings (*see* Ball-bearing Ordnance), White Metal, C. L. B., 173
Belgium, Electrically operated Canals in, 466
Belting, "Teon," at Fleetwood, 86
Bending Moments of Beams, *see* Beams
Benjamin, Prof. C. H., The Bursting of Small Cast-Iron Fly-wheels, 198
Bennis' Mechanical Stoker, 480
Birmingham and its Municipal Electricity Supply, 527
Block, A Useful Scribing, E. H. H., 176
Board of Trade, deputation of the Association of Municipal Tramway Managers to, 93
  returns, imperfect figures in, 188
Bogie Wagons, 30-ton Steel, for the Caledonian Railway, built by the American Steel Car Foundry Co., 532
Boiler(s), (*see also* Steam Boilers), Action of Feed-Waters on, (Bowen on), 559
—— Shell, Circumference of, query *re*, 275, 375, reply, 458
—— Tubes, improved mode of fixing, 469
Bolt-heads, Detachable, for use on Machine Tables, J. Green, 372
—— Support, A, "Practical," 80
Boring, (*see also* Re-boring), Device, A, G. Weeks, 171
—— and Turning Eccentrics, H. Hellfritsch, 451
—— Wood Bowls, A. T. Metcalf, 451
Bowls, Wood, Boring of, A. T. Metcalf, 451
Brass, *see* Naval Brass
  Furnaces, A New Method of Repairing, "Brassey," 81
Bremer Arc Lamp, tests of, 564
Bricks and Street-flags, made from Refuse Destructor Clinker, (Watson on), 357
Bridges, *see* Luxemburg, Suspension Bridges
  Footbridge, The, for building the Cables of the New East River Bridge, New York to Brooklyn, L. Harby, jun., 505
  New Bridge over the Rhone, at Valence, (Dumas on), 552
  Newcastle-on-Tyne New Railway Bridge, 460
  Sydney, N.S.W. (Pyrmont) Swing Bridge, 352
—— Reconstruction, An Interesting Operation in, (at Etaples), 131
Bridgework, British, Some Notes on, W. H. Thorpe, 7
British, *see* England, Great Britain, *etc.*
  Bridgework, Some Notes on, W. H. Thorpe, 7
  Central Africa, need of Railway Communication in, 281
  Colonies, Neglected, (L.), 281
  Enterprise on the Continent, (Middleton's work on the Entrepôt Dock, Amsterdam), E. C. Amos, 320
  Guiana, a neglected gold-producing colony, 282
  Honduras, need of Railways in, 281
  Industry, The Future of, 185
  Locomotives, The Triumph of, (L.), 3
  Navy, *see* "Good Hope"
  Trade Prospects in S. Africa, (L.), 1
  Westinghouse Co., Ltd., The Manufacturing Works of, 65
  Workmanship, An Object Lesson in, Cowlairs Incline Engine, . . . , B. Taylor, 191
  and American Mining Machinery on the Transvaal Goldfields, P. J. N. Fowler, 117
Bugsworth Tunnel, (Midland Line), Demolition of, G. C. MacDonald, 383
Building a Commutator, query *re*, 375, 458
Building(s), Lattice Girders in, 183
  Steel Cage, Underpinning an Unfinished, N. York, 357
